

PUT AN END TO YIELD-SUCKING PESTS.

POTATO THREAT ALERT

Beleaf® 50SG insecticide from FMC is here for you.

It doesn't take long for insects to do costly damage to your potato crop. Beleaf® 50SG insecticide from FMC protects your potato fields with a unique mode of action that selectively targets piercing and sucking insects and stops them from feeding within 30 minutes to an hour. Beleaf 50SG insecticide can limit damage from even your most troubling pests when using rate ranges according to label.

• APHIDS	• PLANT BUGS	• POTATO PSYLLID	• GREENHOUSE
2.0-2.8 OZ./A	2.0-2.8 OZ./A	2.0-2.8 OZ./A	WHITEFLY
			2.8 OZ./A

Control insect pests that vector costly diseases.

Beleaf 50SG insecticide stops insect feeding fast and keeps pests away with long-lasting residual control.

- Affects the potassium channels in the pest's nervous system, permanently and irreversibly putting a stop to feeding within 30 minutes to an hour of ingestion.
- Only insecticide on the market that prevents aphids, lygus and psyllid from piercing the plant's cells and transmitting diseases such as potato virus Y and zebra chip disease.
- An excellent addition to an effective resistance management strategy with unique mode of action as a Group 29 insecticide.
